

CO4-AT2-Coding Golf Competition

Name : Thanigaivel S

Reg No : 192565006

The screenshot displays the SIMATS Online Programming Lab interface. At the top, the browser address bar shows the URL: `simatslab.siveetha.com/practice_app/classactivity/attempt/assignment_id=1373`. The page header includes the SIMATS ENGINEERING logo, the title "SIMATS Online Programming Lab", and the user profile "Thanigaivel S 192565006RB".

The main content area is titled "Q1 Quick sort 100 marks" and indicates "1/1 answered". The problem statement is: "Write a program to sort the array 50, 23, 9, 18, 61, 32 using Quick Sort."

The "Your Code" section contains the following C code:

```
1 #include <stdio.h>
2 void quickSort(int arr[], int low, int high) {
3     if (low < high) {
4         int pivot = arr[high], i = low;
5         for (int j = low; j < high; j++) {
6             if (arr[j] < pivot) {
7                 int temp = arr[i];
8                 arr[i] = arr[j];
9                 arr[j] = temp;
10                i++;
11            }
12            int temp = arr[i];
13            arr[i] = arr[high];
14            arr[high] = temp;
15            quickSort(arr, low, i - 1);
16            quickSort(arr, i + 1, high);
17        }
18    }
19    int main() {
20        int arr[] = {50, 23, 9, 18, 61, 32}, n = 6;
21        quickSort(arr, 0, n - 1);
22        for (int i = 0; i < n; i++) printf("%d ", arr[i]);
23        return 0;
24    }
```

The "Input" section shows "stdin input". The "Output" section displays the sorted array: "9 18 23 32 50 61".
